Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 June 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Currently, claims 15-28 are pending and are under examination herein.

Claim Rejections -35 U.S.C. § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are drawn to solvates of the compound in part b) of the claims; however, there is no explanation in the specification of what the solvates of the compound are.

Claim Rejections – 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-28 rejected under 35 U.S.C. 103(a) as being unpatentable over Alvaro et al. (US Patent 7,189,713).

Alvaro et al. teach pharmaceutical compositions containing NK 1 receptor antagonists including part b) of instant claim 15 and pharmaceutically acceptable salts (including hydrochloride) and solvates thereof (2-(R)-(4-fluoro-2-methyl-phenyl)-4-(S)-

((8aS)-6-oxo-hexahydro-pyrrolo[1,2-a]-pyrazin-2-yl)-piperidine-1-carboxylic acid [1-(R)-(3,5-bis-trifluoromethyl-phenyl)-ethyl]-methanamide; Col. 15, lines 50-53 and 59-61).

Example 11b and claim 16 teach the hydrochloride form of the compound of part b). It is taught that the compounds of the invention may be administered in combination with selective serotonin reuptake inhibitors (SSRI) which include paroxetine (Col. 19, lines 62-65, Col. 20, lines 7-9). It is taught that the pharmaceutical compositions are useful for treatment of depression and/or anxiety (Col. 16, lines 10-15; Col. 17, lines 43-67 – Col. 18, lines 1-9). Alvaro et al. teach the dose of the NK1 receptor antagonist is 1 to about 1000 mg per day (Col. 22, lines 1-6).

Alvaro does not teach specific doses that fall in the ranges as claimed of the NK1 receptor antagonist or paroxetine.

Furthermore, it is obvious to vary and/or optimize the amount of the NK1 receptor antagonist and paroxetine provided in the composition, according to the guidance provided by Alvaro, to provide a composition having the desired properties such as the desired concentrations of each agent to effectively treat depression or anxiety. It is noted that "[W]here the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation." In re Aller, 220 F.2d 454, 456, 105 USPQ 233, 235 (CCPA 1955).

Conclusion

No claims are allowed.
